

PERFECT SKIN

by Frances Furlong

Award winner Frances Furlong

Rgn Bsc (hons) Inp.

offers a wide range of treatments for Men and Women

Plexr is a cordless hand operated micro-surgical device that transfers concentrated heat to the treated skin tissue. It uses the difference in voltage between the device and the patients skin, generating a small electrical arc, similar to lightening. Plexr ionises the existing gases in the gap atmosphere (that would be the space between the needle tip and the patient's skin) producing plasma. The small lightening sublimates the fluids contained in the superficial part of the skin, without unwanted heat transmission to the adjacent tissues. Additionally it acts on the superficial layer of the skin preserving the lower layers, which reduces drastically any potential permanent skin damage that could be caused by the misuse of conventional lasers.

“ Following the results of my initial Plexr treatment to my under eye area I was delighted at 6 weeks with my results, however the most astonishing thing was when Frances reviewed me at 12 weeks. Following a specific skin care program of firm and lift serum and face sculpture cream to strengthen the surrounding areas of my face, I couldn't believe how much it improved further, as you can see from my photos I not only look fresher, I'm enjoying the compliments from others on how well I look!

Thanks to Frances Furlong of Perfect Skin for your support and advice throughout my treatment journey.
