

POWERFUL VITAMIN PEEL

With Frances Furlong

Finally the weather is starting to pick up, I think we would all agree it's been a very long, cold winter. Unfortunately our skin has suffered as a consequence. The dramatic temperature changes from bitterly cold, windy days, then going indoors to dry hot central heating plays havoc with the skin. I highly recommend the new Neostrata Retinol peel with added boosting complex as a must have treatment to repair damaged skin and boost collagen as well as leaving your skin radiant with a youthful healthy glow - just in time for summer.

This advanced physician-strength peel contains 3% retinol plus retinol boosting complex to exfoliate and improve the appearance of fine lines and wrinkles, plump and firm skin while promoting a bright, even and clear complexion. Contains soothing Bisabol to help calm skin.

Key points

- The Retinol, Aminofil and Neocitriate formula reduces the appearance of fine lines, wrinkles, laxity, mottled Pigmentation and pore size, and enhances clarity and radiance.
- Appropriate for mild to moderate skin imperfections as determined by a physician.
- Noticeable exfoliation.
- Can be used on blemish prone skin.

Conditions that can be treated

- Fine lines and wrinkles.
- Hyperpigmentation.
- Acne scars.
- Pore size.
- Uneven or rough texture.
- Dull skin tone.
- Acne prone skin.

Observable changes to the skin

- Improved appearance.
- Evening of skin tone.
- Visual softening.
- Diminished appearance in size.
- Increased smoothness.
- Enhanced natural glow.
- Reduced appearance of blemishes.

These superficial peels are often conducted in a series of several peels to gain a noticeable improvement to the face. Given 6-8 weekly, essential to use a daily SPF protector. £150 each treatment.

Products to enhance, intensify and maintain results.

Inspira Medical Advanced Radiance serum - vitamin C and copper peptides to generate elastin, collagen with vitamin C to smooth the complexion and effectively combat age spots and pigment.

Neostrata sheer defence SPF 50 - lightweight formula, suitable for dry or sensitive skin. To protect your skin on a daily basis.

After perfecting your skin imperfections and achieving smoother firmer skin, we can consider other factors that can spoil a complexion like:-

Facial veins- these unsightly broken capillaries on the face can be easily treated with a course of short wave diathermy, a tiny hair like needle is applied to the skin and conducts an electrical current to heat up the blood in the vein. The blood first clots and is then broken down and reabsorbed by the body. 2-3 sessions are usually needed - average price £100. ■

Dramatic temperature changes from bitterly cold, windy days, to dry hot central heating plays havoc with the skin.
